

SMS Alerter - 8

- SMS Alerter - 8 can be used for sending critical alerts to 5 mobile numbers stored in its memory, to enable an immediate, informed, remedial action thus preventing any major undesired incident and thereby increasing productivity.
- There is a flexibility to the user such that the 8 Inputs or Outputs are factory configurable so that any combination of them are possible.
- The unit is housed in Ip65 plastic enclosure to withstand demanding environmental requirements.

SMS Alerter - 8

Features & Specifications

Trigger Input	
Number of Ports	8 (Mix of Digital inputs / Analog inputs / Relay outputs can be optional)
Default Ports	4 Digital Inputs / 2 Analog Inputs / 2 Relay Outputs
Digital Input	
Input Voltage	5 - 24 V DC
Isolation	3750 V RMS
Terminals	Screw Type provided inside box
Analog Input	
Input Voltage	0 - 12 V DC
Input Type	Singlehanded, 4 - 20 mA
Terminals	Screw Type provided inside box
Relay Output	
Relay Contacts	Normally Open, Common
Contact Rating	1 A at 120 V or 1 A at 24 V DC
Network Interface	
Interface	GSM / GPRS
Protocols	SMS / HTTP
Configuration	
Master Number	One, Configurable
SMS Recipient Number	Up to 5, Configurable
Command	SMS based from Master number only
Power	
Input	12 V DC adaptor supplied with the unit
Packaging	
Enclosure	IP 65 Box
Dimensions (LxWxH)	201 mm (L) x 122 mm (W) x 55mm (H)
Weight	430 g
Warranty	12 months for box product

Applications

- Data Centre Monitoring
- Process Control industries
- Pharmaceutical Industries
- Perishable goods storage
- Manufacturing industries
- Chemical Industries
- Air-conditioning & Refrigeration industry
- Security Monitoring
- Solar Power generations
- Remote Monitoring of locations / Services.
